

International Workshop:

Fiber Reinforced Concrete: from Design to Structural Applications

Tempe, Arizona
September 18-20, 2023

This workshop aims to provide State-of-the-Art on the recent worldwide progress that has been made in terms of specifications, structural design, and real applications of FRC structures. We believe that we have reached a threshold to extend the use of FRC into many broader areas of structural applications. The topics have been carefully selected to address various design guides, and experiences with fibre-reinforced concrete including mixtures, production, analysis and design, and case studies of using FRC materials.

Three levels of sponsorship:

Platinum Sponsor

\$5,000 | *FMV \$2,600*

- four registration fees;
- one exhibition booth;
- name of the company in the acknowledgements of the proceedings;
- four copies of the Proceedings;
- verbal and written acknowledgement at the banquet dinner;
- company name and logo on the workshop website, and slide deck shown in-between workshop sessions.

Gold Sponsor

\$3,000 | *FMV \$1,300*

- two registration fees;
- one exhibition desk;
- three copies of the proceedings;
- verbal and written acknowledgement at a workshop lunch;
- company name and logo on the workshop website, and slide deck shown in-between workshop sessions.

Silver Sponsor

\$1,500 | *FMV \$650*

- one registration fee;
- one copy of the proceedings;
- verbal and written acknowledgement at a coffee break;
- company name and logo on the workshop website, and slide deck shown in-between workshop sessions.
